

# AML Lockdown Utility

### 1

To use the AML Lockdown application, begin by tapping the AML Lockdown icon on the home page.

#### 2

Select the applications you want your users to have access to. Uncheck any applications that you don't want to allow access to.

<u>OPTIONAL</u>: Tap and hold apps to enable *Auto Launch on boot*:

<u>OPTIONAL</u>: Tap the Menu icon and Change Password to change the default password of "aml".

## 4

- 1. Select Launcher AML Lockdown and press the home key it twice.
- 2. Only enabled apps and user toolbar icons will be accessible.

- Note: the user toolbar icons allow the following:
  - View device information and status
  - Adjust sound volume
  - Adjust brightness
  - Toggle Wifi on/off

## To disable AML Lockdown

- 1. Hold down the *Delete/Backspace key* to prompt for password. (*The default password is* "**aml**").
- 2. Select *Launcher3* to revert to default home screen, and press the home key twice.
