END OF SERVICE ANNOUNCEMENT!

Effective **December 31, 2019**, AML will no longer offer break-fix repair services on **M5900 Batch Mobile Computers**.

Production on these devices ceased 5 years ago, or longer, and many of the components necessary to make repairs are no longer available.

For those customers that may have maintenance agreements extending out beyond December 31st, 2019, we will honor those agreements to their expiration dates. Maintenance agreements after the time of this announcement, will terminate at December 31st, 2019.

For those looking to replace your existing devices, we would encourage you to look at our current product offerings:

The **M7225b Batch Mobile Computer** would be an ideal replacement for the M5900. It is the identical form factor, but is powered by Windows CE6 and features a color touchscreen. The M7225b comes pre-loaded with our DC Suite Software with applications very similar to those pre-loaded on the M5900. The M7225b also uses the same charging cradles and other accessories as the M5900.

An alternative to the M7225b, for an ideal M5900 replacement, would be the **LDX10 Batch Handheld Computer.** In a smaller form factor, the LDX10 also comes pre-loaded with DC Suite Software and does not require a charging cradle.

Migration Path for *M5000, M5500, or M5900*

If you own either of these two devices, the M5000 or the M5900, and you wish to continue operating in and "off-line" or batch mode, either the LDX10 or the M7225B would be an ideal replacement. Both devices come pre-loaded with our DC Suite software which is not unlike the pre-loaded applications that were available on the M5000 and the M5900,

AML's DC Suite software includes seven applications to accomodate the most common barcode data collection tasks, making it ready to go to work right out of the box. Collected data can be easily uploaded to any Windows PC using a USB cable.

LDX10

- 2.8" Color Touchscreen
- 24-key tactile keypad
- 1D barcode scanning (2D Optional)
- 512MB User Memory
- 13 watt-hour battery
- USB Communications
- No cable required

M7225b

- 3.5" Color Touchscreen
- 55-key tactile keypad
- 1D barcode scanning (2D Optional)
- 19 watt-hour hot-swappable battery
- USB Communications
- Uses same cradle as M5900
- Available with or without handle
