

END OF SERVICE ANNOUNCEMENT!

Effective **December 31, 2019**, AML will no longer offer break-fix repair services on the **M71V2 and M7220 Wireless Terminal** product families.

Production on these devices ceased 5 years ago, or longer, and many of the components necessary to make repairs are no longer available.

For those customers that may have maintenance agreements extending out beyond December 31st, 2019, we will honor those agreements to their expiration dates. Maintenance agreements after the time of this announcement, will terminate at December 31st, 2019.

For those looking to replace your existing devices, we would encourage you to look at our current product offerings:

The **Triton Wireless Terminal** is a virtual drop-in replacement for the M71V2 or M7220 and uses the same cradles, batteries, and other accessories.

The **Scepter Mobile Computer** is an exciting new mobile device featuring the Android operating system, a 5" display, and was designed to accommodate terminal emulation as well as web-based applications.
