# AML Lockdown Utility

1

To use the AML Lockdown application, begin by tapping the AML Lockdown icon on the home page.

2

Select the applications you want your users to have access to. Uncheck any applications that you don't want to allow access to.

*OPTIONAL*: Tap and hold apps to enable *Auto Launch on boot*:

Press and hold to undo.

*OPTIONAL:* Tap the *Menu* icon and *Change Password* to change the default password of "**aml**".

OPTIONAL: Add a website to Lockdown Home screen
- Make sure website url has "**https://**"
- Website will launch in default browser

Tap the Menu button, then select "Lockdown" from the dropdown list.

1. Only enabled apps and user toolbar icons will be accessible.

Note: the **user toolbar** icons allow the following:
- View device information and status
- Adjust sound volume
- Adjust brightness
- Toggle Wi-Fi on/off

To disable AML Lockdown

1. Click the Settings Icon
2. Enter password: "aml" or your custom password
3. Click menu.
4. Choose Clear Lockdown.
5. Select Quickstep to revert to original home screen.
