# Migration Path for M5000, M5500, or M5900

If you own either of these two devices, the M5000 or the M5900, and you wish to continue operating in an "off-line" or batch mode, either the LDX10 or the M7225B would be an ideal replacement. Both devices come pre-loaded with our DC Suite software which is not unlike the pre-loaded applications that were available on the M5000 and the M5900.

AML's DC Suite software includes seven applications to accommodate the most common barcode data collection tasks, making it ready to go to work right out of the box. Collected data can be easily uploaded to any Windows® PC using a USB cable.

LDX10

- 2.8" Color Touchscreen
- 24-key tactile keypad
- 1D barcode scanning (2D Optional)
- 512MB User Memory
- 13 watt-hour battery
- USB Communications
- No cradle required

M7225b

- 3.5" Color Touchscreen
- 55-key tactile keypad
- 1D barcode scanning (2D Optional)
- 19 watt-hour hot-swappable battery
- USB Communications
- Uses same cradle as M5900
- Available with or without handle
