**Get Updates from AML**  
Don't forget to register your product(s) online at [www.amltd.com/register](http://www.amltd.com/register) to receive updates about AML products and software.

The M7225 comes with a suite of pre-installed applications as a part of our **DC Suite**. These applications were developed for common data collection tasks and are ready to go right out of the box.

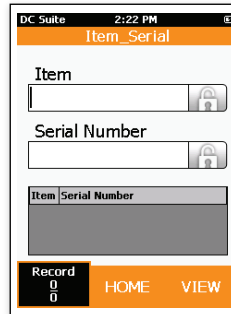

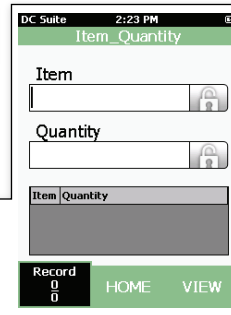

As future applications are developed, they will be made available on the web at [barcodepower.com](http://barcodepower.com).

**Dashboard**  
All applications are launched from here.

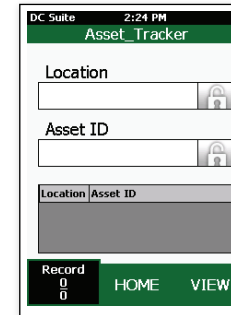

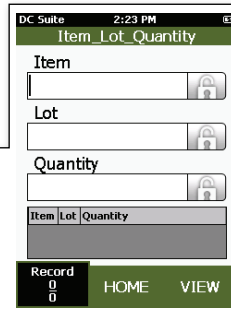

Simple one-field scanning.

Scan the Item Number and key in the Quantity.

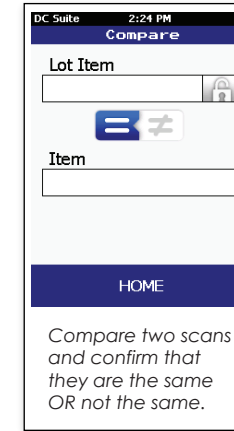

Scan in Item Number and the unique Serial Number.

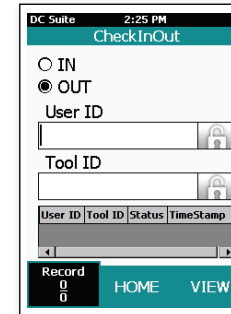

Scan the Item Number and then collect Lot Number and Quantity information.

Asset Tracking application.

Compare two scans and confirm that they are the same OR not the same.

Check-In/Out application for tool or part rooms.

## Download DC Console

Download the DC Console utility at [www.barcodepower.com](http://www.barcodepower.com)

Utilize **DC Console** to quickly modify existing applications or create new ones and transfer files from your M7225 to your PC.

### ▲ IMPORTANT!

Users must install either Microsoft® ActiveSync® or Windows® Mobile Device Center® before installing AML **DC Console**.

*Note:* Microsoft ActiveSync works only with Windows® XP or earlier.

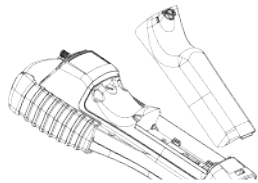

*Note:* The Windows Mobile Device Center is only supported on Windows Vista™ or later.

## Installing a microSD Card

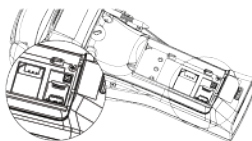

## Using the Integrated Barcode Scanners

## Accessories

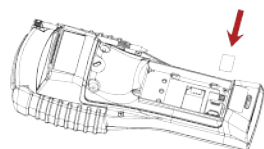

1. Remove the battery cover and main battery.

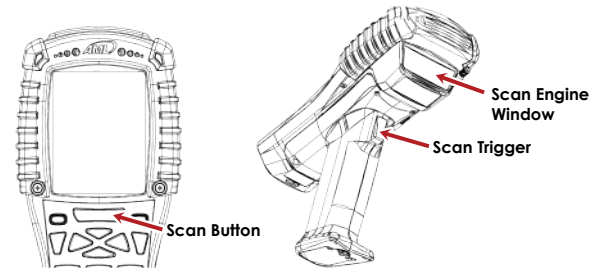

2. Locate the microSD card slot. To open the socket, slide the metal tab to the right and hinge upward.

3. Insert the microSD card fully into the slot. Hinge the tab downward and slide into the locked position.

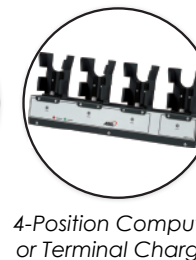

4. Turn the access latch clockwise  
**THE UNIT MUST BE COLD BOOTED AFTER INSERTING SD CARD!**

**Laser** - The laser scan engines require proper alignment of the bar code under the scanner window.

**2D Imager** - Capable of scanning bar codes at any orientation as long as the entire symbol is visible to the scanner and illuminated.
