Scepter

Starts at $2,270 MSRP

The Scepter was engineered for industrial applications such as manufacturing or warehousing, where a rugged device is necessary and the larger 5" display is desirable.

- Android™ 7.1
- 5" LCD with capacitive touchscreen.
- 47-key and 41-key tactile keypads.
- 802.11abgn, BT 4.0
- With or without pistol grip handle.
- 24.8 watt-hour battery.
- Multiple barcode scanning options.
- IP65, 6' drop rating.

Striker

- Android 8.1
- 4" LCD with capacitive touchscreen.
- 47-key tactile keypad.
- 802.11abgnac BT 4.2
- With or without pistol grip handle.
- 24.8 watt-hour battery.
- Multiple barcode scanning options.
- IP65, 6' drop rating.

Starts at $1,895 MSRP

Striker is a smaller, lighter device, but durable enough for harsh environments. It comes preloaded with an assortment of software, including license-free DC Suite, making it out-of-the-box ready for most applications.

SOLO

Starts at $2,170 MSRP

Solo is specifically made for use in secure environments where the presence of radios, or even radio components, are strictly forbidden. Solo is ideal for aerospace, military bases and defense contractors.

- Radio-free device.
- Android 7.1
- 5" LCD with capacitive touchscreen.
- 47-key and 41-key tactile keypads.
- With or without pistol grip handle.
- DC Suite data collection software.
- 24.8 watt-hour battery.
- Multiple barcode scanning options.
- IP65, 6' drop rating to concrete.

Firebird VMU

- Vehicle Mount Computer.
- Android 8.1
- 7" LCD with capacitive touchscreen
- Shock and vibration tested.
- Tethered or Bluetooth barcode scanner.
- Standard VESA 75mm mounting pattern.
- Landscape or portrait mode.

Starts at $1,595 MSRP

The Firebird Vehicle Mount Computer fills a void in the market for affordable, yet durable, forklift-mounted devices. The Firebird VMU is sized right to provide the user with a large 7" screen to keep task-related data easily viewable without impeding the driver's view.

MADE IN USA SINCE 1983

Firebird

Starts at $1,695 MSRP

The Firebird self-service kiosk is equipped with a 2D barcode scanner and can be powered over PoE equipped networks. The Firebird is also capable of running AML's StoreScan price verification software for retail applications.

- Self-Service Kiosk.
- Android® 8.1
- 7" LCD with capacitive touchscreen.
- 1.8 GHz octa-core processor.
- Landscape or portait mode.
- Dual 2W speaker in landscape mode.
- 2D omnidirectional barcode scanner.
- Optional 13MP camera.
- Power: PoE, 5VDC

Monarch+

Starts at $2,395 MSRP

- Self-Service Kiosk.
- Windows® 10
- 10.1" LCD with capacitive touchscreen.
- 2D omnidirectional barcode scanner.
- USB, Ethernet, HDMI.
- Optional 802.11bgn with BT 4.0
- Power: PoE+, 5VDC

The Monarch+'s powerful architecture provides the performance of a desktop in user-facing applications. Integrated barcode scanning, printer, mag-stripe reader and EMV reader are all available options, as is our StoreScan price verification software.

LDX10

Starts at $795 MSRP

The LDX10 is perfect when real time data transfer is not required and an affordable solution is a priority. Pre-loaded DC Suite software includes pre-loaded apps for common data collection tasks. Customize your own apps using the DC Console program generator. Exports data into Excel or CSV formats for easy import into host applications.

- Windows® CE
- 2.8" LCD with resistive touchscreen.
- 24-key tactile keypad.
- 13.4 watt-hour battery.
- Barcode Scanner: 1D Linear, 2D Imager.
- USB data transfer.
- Includes DC Suite applications as well as DC Console Program Generator.
