

Air Gap Data Collection Handheld

Radio-free Barcode Data Collector for Secure Environments including Government, Military, and Defense Contractors

SOLO PROVIDES SECURE BARCODE DATA COLLECTION

Multiple clients approached AML looking for a rugged, radio-free data collection device. We quickly recognized the need and responded. In environments where any type of radio connectivity is strictly forbidden, Solo is the only **Made in America** data collection device that can answer the call.

PRELOADED SOFTWARE

Solo comes preloaded with AML's **DC Suite** barcode data collection software. Many common data collection tasks can be accomplished by using one of the seven pre-written DC Suite applications. The DC Console desktop program can be used to write your own applications or customize existing ones.

DEVICE FEATURES
